

Project Design Phase-II Data Flow Diagram & User Stories

Date	03 July 2026
Team ID	
Project Name	Cosmetic Insights: Navigating Cosmetics Trends and Consumer Insights with Tableau
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

Example: (Simplified)

Flow

1. User configures credentials for the Watson Natural Language Understanding service and starts the app.
2. User selects data file to process and load.
3. Apache Tika extracts text from the data file.
4. Extracted text is passed to Watson NLU for enrichment.
5. Enriched data is visualized in the UI using the D3.js library.

DFD Level-0 (Context Diagram)

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Business Analyst	Data Import	USN-1	As a user, I can import the cosmetic dataset into Tableau for analysis.	Dataset is successfully loaded into Tableau.	High	Sprint-1
	Data Preparation	USN-2	As a user, I can verify and prepare the dataset before visualization.	Dataset is clean and ready for analysis.	High	Sprint-1
	KPI Dashboard	USN-3	As a user, I can view KPI cards showing Total Products, Total Brands, and Skin-Type Count.	KPI cards display accurate values.	High	Sprint-1
	Dashboard	USN-4	As a user, I can view interactive charts for brand, category, and price analysis.	Dashboard displays all visualizations correctly.	High	Sprint-2
	Interactive Filters	USN-5	As a user, I can filter dashboard data by Brand, Category, and Skin Type.	Filters update all charts correctly.	High	Sprint-2
Retail Manager	Product Analysis	USN-6	As a manager, I can identify the Top 10 cosmetic brands and product categories.	Top-performing brands and categories are displayed correctly.	Medium	Sprint-2
	Skin-Type Analysis	USN-7	As a retail manager, I can analyze products suitable for different skin types to improve product selection.	Skin-type analysis is displayed accurately with interactive visualizations.	High	Sprint-2
Product Manager	Price Analysis	USN-8	As a product manager, I can compare product prices and rankings to evaluate product performance.	Price vs. Rank visualization displays accurate results.	Medium	Sprint-2
	Brand Price Analysis	USN-9	As a product manager, I can compare the average prices of different cosmetic brands to support pricing decisions.	Average Price by Brand visualization displays correct values.	High	Sprint-2
Business Executive	KPI Dashboard	USN-10	As a business executive, I can view KPI metrics to monitor overall business performance.	KPI cards display accurate values for Total Products, Total Brands, and Skin-Type Count.	High	Sprint-2
	Business Insights Dashboard	USN-11	As a business executive, I can use interactive dashboards and filters to support strategic business decisions.	Dashboard filters update visualizations correctly and provide meaningful insights.	High	Sprint-2
