

Project Design Phase

Problem – Solution Fit Template

Date	04 July 2026
Team ID	
Project Name	Cosmetic Insights: Navigating Cosmetics Trends and Consumer Insights with Tableau
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why

Purpose:

- ☐ Solve complex problems in a way that fits the state of your customers.
- ☐ Succeed faster and increase your solution adoption by tapping into existing mediums and channels of behavior.
- ☐ Sharpen your communication and marketing strategy with the right triggers and messaging.
- ☐ Increase touch-points with your company by finding the right problem-behavior fit and building trust by solving frequent annoyances, or urgent or costly problems.
- ☐ **Understand the existing situation in order to improve it for your target group.**

Template:

Problem-Solution fit canvas 2.0		Purpose / Vision To enable data-driven decision-making in the cosmetic industry through interactive data visualization and business analytics.	
1. CUSTOMER SEGMENT(S) CS Who is your customer? I.e. working parents of 0-5 y.o. kids Cosmetic retailers, cosmetic product managers, brand managers, marketing analysts, business analysts, e-commerce managers, and business executives responsible for analyzing cosmetic product data.	6. CUSTOMER CONSTRAINTS CC What constraints prevent your customers from taking action or limit their choices of solutions? I.e. spending power, budget, no cash, network connection, available devices. Limited Tableau knowledge, limited data visualization skills, large datasets, manual reporting processes, and time constraints.	5. AVAILABLE SOLUTIONS AS Which solutions are available to the customers when they face the problem or need to get the job done? What have they tried in the past? What pros & cons do these solutions have? I.e. pen and paper is an alternative to digital notetaking Excel spreadsheets, static reports, manual calculations, and basic charts that are difficult to analyze and update.	Explore AS, differentiate
2. JOBS-TO-BE-DONE / PROBLEMS J&P Which jobs-to-be-done (or problems) do you address for your customers? There could be more than one; explore different sides. Analyze cosmetic product distribution, compare brands, evaluate pricing, identify products suitable for different skin types, and make informed business decisions.	9. PROBLEM ROOT CAUSE RC What is the real reason that this problem exists? What is the back story behind the need to do this job? I.e. customers have to do it because of the change in regulations. Large amounts of cosmetic product data are difficult to interpret manually, making comparisons across brands, categories, prices, product counts, and skin types time-consuming and inefficient.	7. BEHAVIOUR BE What does your customer do to address the problem and get the job done? I.e. directly related: find the right solar panel installer, calculate usage and benefits; Indirectly associated: customers spend free time on volunteering work (I.e. Greenpeace) Users collect cosmetic product data, analyze Excel spreadsheets, compare brands and categories manually, calculate KPIs, and prepare reports for decision-making.	Focus on J&P, tap into BE, understand RC
3. TRIGGERS TR What triggers customers to act? I.e. seeing their neighbour installing solar panels, reading about a more efficient solution in the news. Need to launch new products, compare competitors, review product performance, optimize pricing strategies, or prepare business reports.	10. YOUR SOLUTION SL If you are working on an existing business, write down your current solution first, fill in the canvas, and check how much it fits reality. If you are working on a new business proposition, then keep it blank until you fill in the canvas and come up with a solution that fits within customer limitations, solves a problem and matches customer behaviour. An interactive Tableau dashboard that visualizes KPIs, product categories, brand performance, pricing analysis, skin-type suitability, and product rankings to simplify analysis and support better business decisions.	8. CHANNELS OF BEHAVIOUR CH 8.1 ONLINE What kind of actions do customers take online? Extract online channels from #7 Tableau Public, Tableau Cloud, company analytics portal, web browsers. 8.2 OFFLINE What kind of actions do customers take offline? Extract offline channels from #7 and use them for customer development. Business meetings, printed reports, presentations, and management reviews.	Extract online & offline CH of BE
4. EMOTIONS: BEFORE / AFTER EM How do customers feel when they face a problem or a job and afterwards? I.e. lost, insecure > confident, in control - use it in your communication strategy & design. Before: Confused, overwhelmed, time-consuming manual analysis. After: Confident, informed, faster decision-making using interactive dashboards.
